Content

- Assignment #8

New assignment

Do this week assignments

- Create a calculator application in C

- The calculator must do multiplication, summation, subtraction and division

- The application must work using command line arguments

  - ./calc -t sum -a 1 -b 2

  - ./calc -t mul -a 1 -b 2

  - ...

- The applications must print the operation result in the screen

Some details

- The src code must be in your github repository as previous works
- It must use cmake to build the software

Grades

- 1 If not submission
- 4 if all operations works and the CLI interface is well implemented
- 6 if previous + use Cmake to build
- 7 if previous and add a sqrt function
  - ./calc -t sqrt -a 9

When done:

- Send an email to inform to cristhian.aguilera@ulagos.cl. Then I will check your repository.
