Content

- Assignment #5

New assignment

Create a html website according to the following mockup

Be careful of every detail: placeholder, title, etc. The logo is up to you

Some details

- The src code must be in your github repository as previous works

- It must use npm (as we saw in the previous lecture)

- It must use a css framework

Grades

- 1 If not submission

- 4 if mockup is replicated, but details are missing. For example, no title, no place holders, etc

- 6 if web has all details and use a css framework

- 7 if all previous and npm contains scripts to run the example

When done:

- Send an email to inform to cristhian.aguilera@ulagos.cl. Then I will check your repository.
